

Amendments to the Abstract:

Please replace the Abstract with the following amended abstract:

A cabin structure (1) for a working machine ~~comprises~~ includes a substantially transparent cabin element (4) equipped with a bottom part (3), ~~as well as working means (5,~~ ~~6)~~ placed ~~inside the cabin element (4), i.e.~~ having a seat (5) for the operator of the working machine, ~~and a display and control means (6) a controller~~ for controlling the operations of the working machine (2). The ~~working means cabin structure~~ also ~~comprises~~ includes a control mechanism (7) with first (7a) and second (7b) means for tilting the ~~working means cabin element~~ in relation to the frame of the working machine (2) in both XZ and YZ directions. The cabin element (4) is arranged to be substantially stationary in relation to the frame of the working machine (2). ~~The working means (5-6) and the seat and controller~~ are placed on a working base (9) placed above the bottom part (3) of the cabin element (4). The control mechanism (7) is ~~placed positioned~~ between the working base (9) and the bottom part (3) of the cabin element (4). The control mechanism also ~~comprises~~ third (7c) means for can also ~~rotating rotate~~ the working base around the Z axis.
